ASX RELEASE

13th OCTOBER 2011

KILLI KILLI REE & GOLD PROJECT SECOND DRILLING PROGRAM COMPLETED THIS SEASON

The Directors of Orion Metals (**ASX:ORM**) advise that a second RC drilling program has been completed on the highly prospective Killi Killi REE and gold project located in the Tanami desert on the Western Australian side of the WA:NT State boarder.

The RC drilling program consisted of 27 shallow holes at 2 separate locations at the Killi Killi West prospect and 3 locations on Killi Killi East prospect areas with a total of 1,005 metres of drilling.

The exploration target is for extensions and additional new zones of significant REE and gold mineralisation hosted in sandstones and conglomerate rocks similar to the Killi Killi REE and gold prospect area discovered late last year.

The results of this drilling program are expected within six weeks with drill samples currently being transported to Perth for REE, gold and other elements analysis with Mr. Adrian Day Exploration Director overseeing the process.
